ELSEVIER

Thin Solid Films 361–362 (2000) 555–564

thin solid films

www.elsevier.com/locate/tsf

Subject Index of Volumes 361–362

Acceptor level
Excited-state spectroscopy of an effective-mass-like level in Cu-rich $CuGaSe_2$, 509
Aerosol
Electrostatic assisted aerosol jet deposition of CdS, CdSe and ZnS thin films, 102
Ag-doping
Structural analysis of $Cu_{1-x}Ag_xGaSe_2$ bulk materials and thin films, 130
Air annealing
Annealing studies on $CuIn(Ga)Se_2$: the influence of gallium, 400
Alloy electrodeposition
Electrodeposition of ZnTe for photovoltaic cells, 388
Annealing
SnO_2 substrate effects on the morphology and composition of chemical bath deposited ZnSe thin films, 177
Thermostability of physical properties of cadmium telluride crystals, 203
Effect of the Ga-content on the defect properties of $CuIn_{1-x}Ga_xSe_2$ single crystals, 411
Annealing of monocrystalline $CuInSe_2$ samples, 482
Studies on monocrystalline $CuInSe_2$ and $CuIn_3Se_5$, 494
Aqueous bath
Electrochemical deposition of SnS thin films, 98
Aqueous solution
Influence of the electrochemical deposition parameters on the microstructure of MoS_2 thin films, 223
Argon
XPS and raman investigations of nitrogen ion etching for depth profiling of $CuInSe_2$ and $CuGaSe_2$, 498
Association
Thermostability of physical properties of cadmium telluride crystals, 203
Atomic layer deposition
Zinc-based buffer layer in the $Cu(InGa)Se_2$ thin film solar cells, 193
Atomic layer epitaxy
Cadmium-free buffer layers deposited by atomic later epitaxy for copper indium diselenide solar cells, 183
Wet treatment based interface engineering for high efficiency $Cu(In,Ga)Se_2$ solar cells, 187
Auger electron spectroscopy
MicroRaman scattering from polycrystalline $CuInS_2$ films: structural analysis, 208
Auger-profiles
Annealing of monocrystalline $CuInSe_2$ samples, 482
Back contacts
The back contact influence on characteristics of CdTe/CdS solar cells, 293
Chemical stability of Sb_2Te_3 back contacts to CdS/CdTe solar cells, 383
A study of the back contacts on CdTe/CdS solar cells, 463
Bandgap grading
Study of the effect of gallium grading in $Cu(In,Ga)Se_2$, 478
Binding energy
Investigation of post-growth Cu-diffusion in In-rich $CuInSe_2$ films, 263
Excited-state spectroscopy of an effective-mass-like level in Cu-rich $CuGaSe_2$, 509
Bridgman method
Studies on monocrystalline $CuInSe_2$ and $CuIn_3Se_5$, 494
Buffer
Processes for chalcopyrite-based solar cells, 533
Buffer layers
ZnSe thin films grown by chemical vapour deposition for application as buffer layer in CIGSS solar cells, 172
Zinc-based buffer layer in the $Cu(InGa)Se_2$ thin film solar cells, 193
Chemical bath deposited $Zn(Se,OH)_x$ on $Cu(In,Ga)(S,Se)_2$ for high efficiency thin film solar cells: growth kinetics, electronic properties, device performance and loss analysis, 450
Buried interfaces
Self-limitation of Na content at the $CdS/Cu(In,Ga)Se_2$ solar cell heterojunction, 360

Cd-diffusion
Nano-structural investigations on Cd-doping into $Cu(In,Ga)Se_2$ thin films by chemical bath deposition process, 346
Cd-doping
Nano-structural investigations on Cd-doping into $Cu(In,Ga)Se_2$ thin films by chemical bath deposition process, 346
Cadmium telluride
Structural dynamics in CdS–CdTe thin films, 1
Pulsed laser deposition and electrodeposition techniques in growing CdTe and $Cd_xHg_{1-x}Te$ thin films, 65
Fast electrodeposition route for cadmium telluride solar cells, 118
Thermostability of physical properties of cadmium telluride crystals, 203
Characterization of II–VI compounds on porous substrates, 213
A study of the effects of varying cadmium chloride treatment on the luminescent properties of CdTe/CdS thin film solar cells, 248

PII: S0040-6090(99)01119-0

The back contact influence on characteristics of CdTe/CdS solar cells, 293
Impedance model for CdTe solar cells exhibiting constant phase element behaviour, 303
Structural and spectroscopic studies of CdS/CdTe heterojunction cells fabricated by electrodeposition, 314
Microstructure of electrodeposited CdS/CdTe cells, 321
Back contacts to CSS CdS/CdTe solar cells and stability of performances, 327
EBIC and luminescence mapping of CdTe/CdS solar cells, 364
Chemical stability of Sb_2Te_3 back contacts to CdS/CdTe solar cells, 383
Recrystallization in CdTe/CdS, 420
Point defects in Cl and Na doped CdTe monograin powders, 443
A study of the back contacts on CdTe/CdS solar cells, 463
High efficiency CSS CdTe solar cells, 520
Modelling polycrystalline semiconductor solar cells, 527
Manufacturing of CSS CdTe solar cells, 547

Capacitance
Transient capacitance spectroscopy of defect levels in CIGS devices, 371

Capacitance dispersion
Impedance model for CdTe solar cells exhibiting constant phase element behaviour, 303

Cathodoluminescence
EBIC and luminescence mapping of CdTe/CdS solar cells, 364

CdS
Structural dynamics in CdS–CdTe thin films, 1
Modelling of the structure of CdS thin films, 34
Electrostatic assisted aerosol jet deposition of CdS, CdSe and ZnS thin films, 102
A study of the effects of varying cadmium chloride treatment on the luminescent properties of CdTe/CdS thin film solar cells, 248
Microstructure of electrodeposited CdS/CdTe cells, 321
Back contacts to CSS CdS/CdTe solar cells and stability of performances, 327
EBIC and luminescence mapping of CdTe/CdS solar cells, 364
Recrystallization in CdTe/CdS, 420
High efficiency CSS CdTe solar cells, 520

$CdS/Cu(In,Ga)Se_2$
Self-limitation of Na content at the $CdS/Cu(In,Ga)Se_2$ solar cell heterojunction, 360

CdSe
Electrostatic assisted aerosol jet deposition of CdS, CdSe and ZnS thin films, 102

CdTe solar cell
New window materials used as heterojunction partners on CdTe solar cells, 378

CdTe/CdS
Grain structure of CdTe in CSS-deposited CdTe/CdS solar cells, 253

CdTe/CdS solar cells
Device analysis methods for physical cell parameters of CdTe/Cds solar cells, 288

Chalcogenides
Flash evaporation of chalcogenide thin films, 22
A novel deposition technique for compound semiconductors on highly porous substrates: ILGAR, 113

Chalcopyrites
Influence of sulphur on the electrical and optical properties of p-type $CuIn(S_xSe_{1-x})_2$ single crystals, 126
Structural analysis of $Cu_{1-x}Ag_xGaSe_2$ bulk materials and thin films, 130
MicroRaman scattering from polycrystalline $CuInS_2$ films: structural analysis, 208
Structure modifications in chalcopyrite semiconductors, 218
Photoluminescence and X-ray fluorescence measurements of successively thinned $CuGaSe_2$ films, 229
Electron-paramagnetic resonance (EPR) and light-induced EPR investigations of $CuGaSe_2$, 243
Structure of extended defects in epitaxial $CuInS_2/Si(111)$, 437
Effect of sodium and oxygen doping on the conductivity of $CuInS_2$ thin films, 468
Low cost techniques for the preparation of $Cu(In,Ga)(Se,S)_2$ absorber layers, 514
Modelling polycrystalline semiconductor solar cells, 527
Processes for chalcopyrite-based solar cells, 533

Characterizations
Study of polycrystalline $CuGaSe_2$ thin films deposited by MOCVD onto ZnO substrates, 135

Chemical bath deposition
Photovoltaic windows by chemical bath deposition, 28
The importance of ternary complexes in defining basic conditions for the deposition of ZnS by aqueous chemical bath deposition, 17
Modelling of the structure of CdS thin films, 34
A novel deposition technique for compound semiconductors on highly porous substrates: ILGAR, 113
Novel approach to the chemical bath deposition of chalcogenide semiconductors, 150
SnO_2 substrate effects on the morphology and composition of chemical bath deposited ZnSe thin films, 177
Microstructure of electrodeposited CdS/CdTe cells, 321
Interface redox engineering of $Cu(In,Ga)Se_2$ – based solar cells: oxygen, sodium, and chemical bath effects, 353
New window materials used as heterojunction partners on CdTe solar cells, 378

Chemical stability
Chemical stability of Sb_2Te_3 back contacts to CdS/CdTe solar cells, 383

Chemical vapour deposition
ZnSe thin films grown by chemical vapour deposition for application as buffer layer in CIGSS solar cells, 172

CIGS, $Cu(InGa)Se_x$
Charging and discharging of defect states in CIGS/ZnO junctions, 140
Texture manipulation of $CuInSe_2$ thin films, 167
Lateral inhomogeneities of $Cu(In,Ga)Se_2$ absorber films, 258
Large area electrodeposition of $Cu(In,Ga)Se_2$, 309
Study of the effect of gallium grading in $Cu(In,Ga)Se_2$, 478
A PL study of CIGS thin films implanted with He and D ions, 488

CIS
Texture manipulation of $CuInSe_2$ thin films, 167
Characterising superstrate CIS solar cells with electron beam induced current, 198

CISCuT
Phase constitution and element distribution in Cu-In-S based absorber layers grown by the CISCuT-process, 273
Cl
Point defects in Cl and Na doped CdTe monograin powders, 443
Close-spaced sublimation
Manufacturing of CSS CdTe solar cells, 547
Co-evaporation
Growth of $Cu(In,Ga)Se_2$ thin films by coevaporation using alkaline precursors, 9
Compositional grading
Study of the effect of gallium grading in $Cu(In,Ga)Se_2$, 478
Compound semiconductor
Structural analysis of $Cu_{1-x}Ag_xGaSe_2$ bulk materials and thin films, 130
Conductivity
Point defects in Cl and Na doped CdTe monograin powders, 443
Effect of sodium and oxygen doping on the conductivity of $CuInS_2$ thin films, 468
Constant phase element
Impedance model for CdTe solar cells exhibiting constant phase element behaviour, 303
Contacts
Back contacts to CSS CdS/CdTe solar cells and stability of performances, 327
Copper indium diselenide
Cadmium-free buffer layers deposited by atomic later epitaxy for copper indium diselenide solar cells, 183
Copper indium disulfide
Composition and structure of $CuInS_2$ films prepared by spray pyrolysis, 61
Copper thiocarbamide complex
Composition and structure of $CuInS_2$ films prepared by spray pyrolysis, 61
Copper–indium–selenide
Deposition of smooth $Cu(In,Ga)Se_2$ films from binary multilayers, 74
Cost estimation
Scaling up issues of CIGS solar cells, 540
CuAu-ordering
Structure modifications in chalcopyrite semiconductors, 218
Cu diffusion
Investigation of post-growth Cu-diffusion in In-rich $CuInSe_2$ films, 263
Cu–In–Se system
Structural characterization of $CuIn_2Se_{3.5}$, $CuIn_3Se_5$ and $CuIn_5Se_8$ compounds, 70
$Cu(In,Ga)(S,Se)_2$ (CIGS)
Growth of $Cu(In,Ga)Se_2$ thin films by coevaporation using alkaline precursors, 9
ZnSe thin films grown by chemical vapour deposition for application as buffer layer in CIGSS solar cells, 172
Chemical bath deposited $Zn(Se,OH)_x$ on $Cu(In,Ga)(S,Se)_2$ for high efficiency thin film solar cells: growth kinetics, electronic properties, device performance and loss analysis, 450
$Cu(In,Ga)Se_2$
Influence of sodium on the growth of polycrystalline $Cu(In,Ga)Se_2$ thin films, 161
Zinc-based buffer layer in the $Cu(InGa)Se_2$ thin film solar cells, 193
Thermally assisted tunnelling in $Cu(In,Ga)Se_2$-based photovoltaic devices, 268
Influence of damp heat on the electrical properties of $Cu(In,Ga)Se_2$ solar cells, 283
Stability of $Cu(In,Ga)Se_2$ solar cells: a thermodynamic approach, 338
Nano-structural investigations on Cd-doping into $Cu(In,Ga)Se_2$ thin films by chemical bath deposition process, 346
Interface redox engineering of $Cu(In,Ga)Se_2$ – based solar cells: oxygen, sodium, and chemical bath effects, 353
Transient capacitance spectroscopy of defect levels in CIGS devices, 371
Effect of substrate temperature and depostion profile on evaporated $Cu(InGa)Se_2$ films and devices, 473
A PL study of CIGS thin films implanted with He and D ions, 488
XPS and raman investigations of nitrogen ion etching for depth profiling of $CuInSe_2$ and $CuGaSe_2$, 498
Scaling up issues of CIGS solar cells, 540
$CuGaSe_2$
Structural analysis of $Cu_{1-x}Ag_xGaSe_2$ bulk materials and thin films, 130
$CuGaSe_2$ Thin films
Study of polycrystalline $CuGaSe_2$ thin films deposited by MOCVD onto ZnO substrates, 135
Photoluminescence and X-ray fluorescence measurements of successively thinned $CuGaSe_2$ films, 229
Electron-paramagnetic resonance (EPR) and light-induced EPR investigations of $CuGaSe_2$, 243
Electronic loss mechanisms in chalcopyrite based heterojunction solar cells, 298
Electronically active defects in $CuGaSe_2$-based heterojunction solar cells, 415
Defects in $CuGaSe_2$ thin films grown by MOCVD, 426
Some results from $CuGaSe_2$ solar cells prepared by rapid thermal processing, 454
Excited-state spectroscopy of an effective-mass-like level in Cu-rich $CuGaSe_2$, 509
Processes for chalcopyrite-based solar cells, 533
$CuIn(Ga)Se_2$
Annealing studies on $CuIn(Ga)Se_2$: the influence of gallium, 400
$CuIn_{1-x}Ga_xSe_2$
15.4% $CuIn_{1-x}Ga_xSe_2$-based photovoltaic cells from solution-based precursor films, 396
Effect of the Ga-content on the defect properties of $CuIn_{1-x}Ga_xSe_2$ single crystals, 411
$CuIn(S_xSe_{1-x})_2$
Influence of sulphur on the electrical and optical properties of p-type $CuIn(S_xSe_{1-x})_2$ single crystals, 126
$CuIn_5S_8$
Phase constitution and element distribution in Cu-In-S based absorber layers grown by the CISCuT-process, 273

$CuInGaSe_2$
Study of the effect of gallium grading in $Cu(In,Ga)Se_2$, 478
$CuInS_2$ thin films
Investigation of the influence of silver on the crystal growth of $CuInS_2$ thin films, 88
$CuInS_2$
Heteroepitaxy of $CuIn_3Se_5$: a review of the material and interface properties, 41
Investigation of thin films of the Cu–In and $CuInS_2$ system, 56
In situ RBS analysis of $CuInSe_2$, 93
Differences in copper indium selenide films obtained by electron beam and flash evaporation, 145
Kinetics of CIS-formation studied in situ by thin film calorimetry, 155
Texture manipulation of $CuInSe_2$ thin films, 167
Characterising superstrate CIS solar cells with electron beam induced current, 198
MicroRaman scattering from polycrystalline $CuInS_2$ films: structural analysis, 208
Investigation of post-growth Cu-diffusion in In-rich $CuInSe_2$ films, 263
Phase constitution and element distribution in Cu-In-S based absorber layers grown by the CISCuT-process, 273
Electrochemical solutions to some thin-film PV manufacturing issues, 278
Electronic loss mechanisms in chalcopyrite based heterojunction solar cells, 298
Stability of $Cu(In,Ga)Se_2$ solar cells: a thermodynamic approach, 338
Interface redox engineering of $Cu(In,Ga)Se_2$ – based solar cells: oxygen, sodium, and chemical bath effects, 353
Control of V_{Se} defect levels in $CuInSe_2$ prepared by rapid thermal processing of metallic alloys, 432
Structure of extended defects in epitaxial $CuInS_2$/Si(111), 437
Calculation and experimental characterization of the defect physics in $CuInSe_2$, 446
Effect of sodium and oxygen doping on the conductivity of $CuInS_2$ thin films, 468
Annealing of monocrystalline $CuInSe_2$ samples, 482
Structural and electronic properties of epitaxially grown $CuInS_2$ films, 504
Low cost techniques for the preparation of $Cu(In,Ga)(Se,S)_2$ absorber layers, 514
Processes for chalcopyrite-based solar cells, 533
$CuInS_2$Ga
Current transport in $CuInS_2$:Ga/Cds/Zno – solar cells, 458
$CuInSe_2$-ZnO
Wet treatment based interface engineering for high efficiency $Cu(In,Ga)Se_2$ solar cells, 187

Damp heat
Influence of damp heat on the electrical properties of $Cu(In,Ga)Se_2$ solar cells, 283
Deconvolution of multilayer system
Characterising superstrate CIS solar cells with electron beam induced current, 198
Deep levels
Transient capacitance spectroscopy of defect levels in CIGS devices, 371
The role of deep donor–deep acceptor complexes in CIS-related compounds, 406
Deep level transient spectroscopy
Thermally assisted tunnelling in $Cu(In,Ga)Se_2$-based photovoltaic devices, 268
Defects
Charging and discharging of defect states in CIGS/ZnO junctions, 140
Thermostability of physical properties of cadmium telluride crystals, 203
Electrochemical solutions to some thin-film PV manufacturing issues, 278
The role of deep donor–deep acceptor complexes in CIS-related compounds, 406
Effect of the Ga-content on the defect properties of $CuIn_{1-x}Ga_xSe_2$ single crystals, 411
Electronically active defects in $CuGaSe_2$-based heterojunction solar cells, 415
Defects in $CuGaSe_2$ thin films grown by MOCVD, 426
Structure of extended defects in epitaxial $CuInS_2$/Si(111), 437
Depth profile
Photoluminescence and X-ray fluorescence measurements of successively thinned $CuGaSe_2$ films, 229
Novel depth profiling in Cds-CdTe thin films, 234
Donor–acceptor pairs
The role of deep donor–deep acceptor complexes in CIS-related compounds, 406
Doping
Defects in $CuGaSe_2$ thin films grown by MOCVD, 426
Effect of sodium and oxygen doping on the conductivity of $CuInS_2$ thin films, 468

Efficiency
Chemical bath deposited $Zn(Se,OH)_x$ on $Cu(In,Ga)(S,Se)_2$ for high efficiency thin film solar cells: growth kinetics, electronic properties, device performance and loss analysis, 450
Electrical properties
Influence of sulphur on the electrical and optical properties of p-type $CuIn(S_xSe_{1-x})_2$ single crystals, 126
Electro-absorbance
Structural and spectroscopic studies of CdS/CdTe heterojunction cells fabricated by electrodeposition, 314
Electrochemical deposition
Electrochemical deposition of SnS thin films, 98
Electrochemical etching
Surface texturisation of ZnTe crystals and thin films, 49
Electrochemistry
Wet treatment based interface engineering for high efficiency $Cu(In,Ga)Se_2$ solar cells, 187
Electrodeposition
Pulsed laser deposition and electrodeposition techniques in growing CdTe and $Cd_xHg_{1-x}Te$ thin films, 65
Deposition of smooth $Cu(In,Ga)Se_2$ films from binary multilayers, 74
Electrochemical deposition of zinc oxide films from non-aqueous solution: a new buffer/window process for thin film solar cells, 79
Electrodeposition of epitaxial CdSe on (111) gallium arsenide, 84

Fast electrodeposition route for cadmium telluride solar cells, 118
Characterization of II–VI compounds on porous substrates, 213
Influence of the electrochemical deposition parameters on the microstructure of MoS_2 thin films, 223
Large area electrodeposition of $Cu(In,Ga)Se_2$, 309
Structural and spectroscopic studies of CdS/CdTe heterojunction cells fabricated by electrodeposition, 314
Microstructure of electrodeposited CdS/CdTe cells, 321
15.4% $CuIn_{1-x}Ga_xSe_2$-based photovoltaic cells from solution-based precursor films, 396
Electroless deposition
15.4% $CuIn_{1-x}Ga_xSe_2$-based photovoltaic cells from solution-based precursor films, 396
Electron beam induced current
Characterising superstrate CIS solar cells with electron beam induced current, 198
EBIC and luminescence mapping of CdTe/CdS solar cells, 364
Electron diffraction
Structure modifications in chalcopyrite semiconductors, 218
Electron-beam evaporation
Differences in copper indium selenide films obtained by electron beam and flash evaporation, 145
Electronic properties and measurements
Investigation of the influence of silver on the crystal growth of $CuInS_2$ thin films, 88
Electron-paramagnetic resonance
Electron-paramagnetic resonance and light-induced EPR investigations of $CuGaSe_2$, 243
Electroreflectance
Structural and spectroscopic studies of CdS/CdTe heterojunction cells fabricated by electrodeposition, 314
Electrostatic
Electrostatic assisted aerosol jet deposition of CdS, CdSe and ZnS thin films, 102
Electrosynthesis
Molten salt route for ZnSe high-temperature electrosynthesis, 107
Electrochemical solutions to some thin-film PV manufacturing issues, 278
Energy dispersive analysis of X-rays
Nano-structural investigations on Cd-doping into $Cu(In,Ga)Se_2$ thin films by chemical bath deposition process, 346
Energy level
Calculation and experimental characterization of the defect physics in $CuInSe_2$, 446
Environmental impact
Novel approach to the chemical bath deposition of chalcogenide semiconductors, 150
Epitaxy
Electrochemical solutions to some thin-film PV manufacturing issues, 278
Structure of extended defects in epitaxial $CuInS_2$/Si(111), 437
Epitaxial growth
Electrodeposition of epitaxial CdSe on (111) gallium arsenide, 84
Eta solar cell
Characterization of II–VI compounds on porous substrates, 213
Etching
Photoluminescence and X-ray fluorescence measurements of successively thinned $CuGaSe_2$ films, 229
A study of the back contacts on CdTe/CdS solar cells, 463
Ethylene glycol
Influence of the electrochemical deposition parameters on the microstructure of MoS_2 thin films, 223
Extrinsic and intrinsic defects
Electron-paramagnetic resonance (EPR) and light-induced EPR investigations of $CuGaSe_2$, 243

Fermi energy
The Electronic effects of point defects in $Cu(In,Ga_{1-x})Se_2$, 330
Field
Charging and discharging of defect states in CIGS/ZnO junctions, 140
Film deposition
Electrostatic assisted aerosol jet deposition of CdS, CdSe and ZnS thin films, 102
Films
Back contacts to CSS CdS/CdTe solar cells and stability of performances, 327
Flash evaporation
Flash evaporation of chalcogenide thin films, 22
Differences in copper indium selenide films obtained by electron beam and flash evaporation, 145
Flow cell
Structural and spectroscopic studies of CdS/CdTe heterojunction cells fabricated by electrodeposition, 314
Formation energy
Calculation and experimental characterization of the defect physics in $CuInSe_2$, 446

GaSe
Photoelectric properties of heterostructures based on thermo-oxidated GaSe and InSe crystals, 123
Glancing angle X-ray diffraction
Modelling of the structure of CdS thin films, 34
Grain size
Effect of substrate temperature and depostion profile on evaporated $Cu(InGa)Se_2$ films and devices, 473
Grain size distribution
Grain structure of CdTe in CSS-deposited CdTe/CdS solar cells, 253
Growth
Influence of sodium on the growth of polycrystalline $Cu(In,Ga)Se_2$ thin films, 161

H_2S
Investigation of thin films of the Cu–In and $CuInS_2$ system, 56
H_2Se annealing
Control of V_{Se} defect levels in $CuInSe_2$ prepared by rapid thermal processing of metallic alloys, 432
Hall effect
Effect of the Ga-content on the defect properties of $CuIn_{1-x}Ga_xSe_2$ single crystals, 411
Heteroepitaxy
Heteroepitaxy of $CuIn_xSe_y$: a review of the material and interface properties, 41

Heterojunction
New window materials used as heterojunction partners on CdTe solar cells, 378
Chemical bath deposited Zn(Se,OH)$_x$ on Cu(In,Ga)(S,Se)$_2$ for high efficiency thin film solar cells: growth kinetics, electronic properties, device performance and loss analysis, 450
High efficiency
Study of the effect of gallium grading in Cu(In,Ga)Se$_2$, 478
High efficiency CSS CdTe solar cells, 520

I–V characteristics
Device analysis methods for physical cell parameters of CdTe/Cds solar cells, 288

II–VI compounds
Photovoltaic windows by chemical bath deposition, 28
Impedance spectroscopy
Impedance model for CdTe solar cells exhibiting constant phase element behaviour, 303
Impurity
Thermostability of physical properties of cadmium telluride crystals, 203
Impurity localization
Self-limitation of Na content at the CdS/Cu(In,Ga)Se$_2$ solar cell heterojunction, 360
In situ monitoring
Kinetics of CIS-formation studied in situ by thin film calorimetry, 155
In_2Se_3
Large area electrodeposition of Cu(In,Ga)Se$_2$, 309
Indium sulfide
Cadmium-free buffer layers deposited by atomic later epitaxy for copper indium diselenide solar cells, 183
Inhomogeneity
Lateral inhomogeneities of Cu(In,Ga)Se$_2$ absorber films, 258
In-line processes
Scaling up issues of CIGS solar cells, 540
InSe
Photoelectric properties of heterostructures based on thermo-oxidated GaSe and InSe crystals, 123
Interdiffusion
Structural dynamics in CdS–CdTe thin films, 1
Interfaces
Heteroepitaxy of CuIn$_x$Se$_y$: a review of the material and interface properties, 41
Characterization of CuGa$_x$Se$_y$/ZnO for superstrate solar cells, 239
Transient capacitance spectroscopy of defect levels in CIGS devices, 371
Interface layer
Photoelectric properties of heterostructures based on thermo-oxidated GaSe and InSe crystals, 123
Interface states
Thermally assisted tunnelling in Cu(In,Ga)Se$_2$-based photovoltaic devices, 268
Interfacial chemistry
Electrodeposition of epitaxial CdSe on (111) gallium arsenide, 84
Intrinsic defects
Calculation and experimental characterization of the defect physics in CuInSe$_2$, 446
Ion beam etching
XPS and raman investigations of nitrogen ion etching for depth profiling of CuInSe$_2$ and CuGaSe$_2$, 498
Ion-beam analysis
Novel depth profiling in Cds-CdTe thin films, 234
Ion-implantation
A PL study of CIGS thin films implanted with He and D ions, 488

Junctions
Charging and discharging of defect states in CIGS/ZnO junctions, 140

LiF
Growth of Cu(In,Ga)Se$_2$ thin films by coevaporation using alkaline precursors, 9
Luminescence
A study of the effects of varying cadmium chloride treatment on the luminescent properties of CdTe/CdS thin film solar cells, 248
The role of deep donor–deep acceptor complexes in CIS-related compounds, 406

Mercury cadmium telluride
Pulsed laser deposition and electrodeposition techniques in growing CdTe and $Cd_xHg_{1-x}Te$ thin films, 65
Metastability
Charging and discharging of defect states in CIGS/ZnO junctions, 140
Metal-oxide chemical vapor deposition
Study of polycrystalline CuGaSe$_2$ thin films deposited by MOCVD onto ZnO substrates, 135
Microscopy
Microstructure of electrodeposited CdS/CdTe cells, 321
Microspot-ESCA
Lateral inhomogeneities of Cu(In,Ga)Se$_2$ absorber films, 258
Microstructure
Modelling of the structure of CdS thin films, 34
Influence of the electrochemical deposition parameters on the microstructure of MoS$_2$ thin films, 223
Modelling
The importance of ternary complexes in defining basic conditions for the deposition of ZnS by aqueous chemical bath deposition, 17
Modelling polycrystalline semiconductor solar cells, 527
Molecular beam epitaxy
Structural and electronic properties of epitaxially grown CuInS$_2$ films, 504
Molten salts
Molten salt route for ZnSe high-temperature electrosynthesis, 107
Monocrystalline
Studies on monocrystalline CuInSe$_2$ and CuIn$_3$Se$_5$, 494
Monocrystals
Annealing of monocrystalline CuInSe$_2$ samples, 482

Morphology
Effect of substrate temperature and depostion profile on evaporated Cu(InGa)Se_2 films and devices, 473
Multilayers
Deposition of smooth Cu(In,Ga)Se_2 films from binary multilayers, 74

Na
Point defects in Cl and Na doped CdTe monograin powders, 443
Na impurities
Self-limitation of Na content at the CdS/Cu(In,Ga)Se_2 solar cell heterojunction, 360
NaF
Growth of Cu(In,Ga)Se_2 thin films by coevaporation using alkaline precursors, 9
Nano particles
Low cost techniques for the preparation of Cu(In,Ga)(Se,S)$_2$ absorber layers, 514
Native defects
Investigation of post-growth Cu-diffusion in In-rich $CuInSe_2$ films, 263
Excited-state spectroscopy of an effective-mass-like level in Cu-rich $CuGaSe_2$, 509
Ni
Chemical stability of Sb_2Te_3 back contacts to CdS/CdTe solar cells, 383
Nitrogen
XPS and raman investigations of nitrogen ion etching for depth profiling of $CuInSe_2$ and $CuGaSe_2$, 498

Optical band-gap
Spray pyrolysis deposition of cadmium–zinc oxide thin films, 53
Optical properties
The role of deep donor–deep acceptor complexes in CIS-related compounds, 406
Ordered vacancy compound
Differences in copper indium selenide films obtained by electron beam and flash evaporation, 145
Outdiffusion
Annealing of monocrystalline $CuInSe_2$ samples, 482
Oxidation
Influence of sodium on the growth of polycrystalline Cu(In,-Ga)Se_2 thin films, 161
Effect of sodium and oxygen doping on the conductivity of $CuInS_2$ thin films, 468
Oxygen
Interface redox engineering of Cu(In,Ga)Se_2 – based solar cells: oxygen, sodium, and chemical bath effects, 353

P–chalcopyrite
Structural characterization of $CuIn_2Se_{3.5}$, $CuIn_3Se_5$ and $CuIn_5Se_8$ compounds, 70
Phase analysis
Phase constitution and element distribution in Cu-In-S based absorber layers grown by the CISCuT-process, 273
Phase diagram
Structural dynamics in CdS–CdTe thin films, 1
Phase formation
Investigation of thin films of the Cu–In and $CuInS_2$ system, 56
Photoelectric properties of heterostructures based on thermo-oxidated GaSe and InSe crystals, 123
Photoconductivity
Studies on monocrystalline $CuInSe_2$ and $CuIn_3Se_5$, 494
Photocurrent
Surface texturisation of ZnTe crystals and thin films, 49
Structural and spectroscopic studies of CdS/CdTe heterojunction cells fabricated by electrodeposition, 314
Photoluminescence
Photoluminescence and X-ray fluorescence measurements of successively thinned $CuGaSe_2$ films, 229
Investigation of post-growth Cu-diffusion in In-rich $CuInSe_2$ films, 263
Annealing studies on CuIn(Ga)Se_2: the influence of gallium, 400
Effect of the Ga-content on the defect properties of $CuIn_{1-x}Ga_xSe_2$ single crystals, 411
Defects in $CuGaSe_2$ thin films grown by MOCVD, 426
Control of V_{Se} defect levels in $CuInSe_2$ prepared by rapid thermal processing of metallic alloys, 432
Point defects in Cl and Na doped CdTe monograin powders, 443
A PL study of CIGS thin films implanted with He and D ions, 488
Structural and electronic properties of epitaxially grown $CuInS_2$ films, 504
Excited-state spectroscopy of an effective-mass-like level in Cu-rich $CuGaSe_2$, 509
Photosensitivity
Photoelectric properties of heterostructures based on thermo-oxidated GaSe and InSe crystals, 123
Photovoltaic
Molten salt route for ZnSe high-temperature electrosynthesis, 107
A study of the effects of varying cadmium chloride treatment on the luminescent properties of CdTe/CdS thin film solar cells, 248
Microstructure of electrodeposited CdS/CdTe cells, 321
Back contacts to CSS CdS/CdTe solar cells and stability of performances, 327
Novel depth profiling in Cds-CdTe thin films, 234
Photovoltaic cells
Modelling of the structure of CdS thin films, 34
Electrochemical deposition of zinc oxide films from non-aqueous solution: a new buffer/window process for thin film solar cells, 79
Photovoltaic devices
Transient capacitance spectroscopy of defect levels in CIGS devices, 371
Photovoltaic modules
Scaling up issues of CIGS solar cells, 540
Physical vapor deposition
15.4% $CuIn_{1-x}Ga_xSe_2$-based photovoltaic cells from solution-based precursor films, 396
Point defects
The Electronic effects of point defects in Cu(In_xGa_{1-x})Se_2, 330
Point defects in Cl and Na doped CdTe monograin powders, 443

Porous silica
A novel deposition technique for compound semiconductors on highly porous substrates: ILGAR, 113
Porous substrates
Characterization of II–VI compounds on porous substrates, 213
Porous titanium dioxide
A novel deposition technique for compound semiconductors on highly porous substrates: ILGAR, 113
Positron lifetime
Calculation and experimental characterization of the defect physics in $CuInSe_2$, 446
Post-growth treatment
Control of V_{Se} defect levels in $CuInSe_2$ prepared by rapid thermal processing of metallic alloys, 432
Precursor
Growth of $Cu(In,Ga)Se_2$ thin films by coevaporation using alkaline precursors, 9
Preferred orientation
Texture manipulation of $CuInSe_2$ thin films, 167
Pulsed laser deposition
Pulsed laser deposition and electrodeposition techniques in growing CdTe and $Cd_xHg_{1-x}Te$ thin films, 65
p-ZnTe crystal
Surface texturisation of ZnTe crystals and thin films, 49

Quantum efficiency
The back contact influence on characteristics of CdTe/CdS solar cells, 293

Raman
XPS and raman investigations of nitrogen ion etching for depth profiling of $CuInSe_2$ and $CuGaSe_2$, 498
Raman scattering
MicroRaman scattering from polycrystalline $CuInS_2$ films: structural analysis, 208
Rapid thermal processing
Some results from $CuGaSe_2$ solar cells prepared by rapid thermal processing, 454
Reaction kinetics
Kinetics of CIS-formation studied in situ by thin film calorimetry, 155
Reactive annealing
Investigation of thin films of the Cu–In and $CuInS_2$ system, 56
Recombination
Electronic loss mechanisms in chalcopyrite based heterojunction solar cells, 298
Electronically active defects in $CuGaSe_2$-based heterojunction solar cells, 415
Current transport in $CuInS_2$:Ga/Cds/Zno – solar cells, 458
Recrystallization
Structural dynamics in CdS–CdTe thin films, 1
Recrystallization in CdTe/CdS, 420
Recycling
Electrochemical solutions to some thin-film PV manufacturing issues, 278
Rietveld refinement
Structural characterization of $CuIn_2Se_{3.5}$, $CuIn_3Se_5$ and $CuIn_5Se_8$ compounds, 70
Rutherford backscattering spectrometry
In situ RBS analysis of $CuInSe_2$, 93

Sb_2Te_3
Chemical stability of Sb_2Te_3 back contacts to CdS/CdTe solar cells, 383
Scaling up
Scaling up issues of CIGS solar cells, 540
Schottky diode behaviour
Device analysis methods for physical cell parameters of CdTe/Cds solar cells, 288
Secondary ion mass spectroscopy
Annealing studies on $CuIn(Ga)Se_2$: the influence of gallium, 400
Selenium
Influence of sodium on the growth of polycrystalline $Cu(In,Ga)Se_2$ thin films, 161
Semiconductor electrodeposition
Electrodeposition of ZnTe for photovoltaic cells, 388
Semiconductors
Molten salt route for ZnSe high-temperature electrosynthesis, 107
A study of the effects of varying cadmium chloride treatment on the luminescent properties of CdTe/CdS thin film solar cells, 248
The role of deep donor–deep acceptor complexes in CIS-related compounds, 406
Sequential processing
Kinetics of CIS-formation studied in situ by thin film calorimetry, 155
Some results from $CuGaSe_2$ solar cells prepared by rapid thermal processing, 454
SnO_2
SnO_2 substrate effects on the morphology and composition of chemical bath deposited ZnSe thin films, 177
SnS
Electrochemical deposition of SnS thin films, 98
Sodium
Influence of sodium on the growth of polycrystalline $Cu(In,Ga)Se_2$ thin films, 161
Interface redox engineering of $Cu(In,Ga)Se_2$ – based solar cells: oxygen, sodium, and chemical bath effects, 353
Solar cells
Structural dynamics in CdS–CdTe thin films, 1
Flash evaporation of chalcogenide thin films, 22
Photovoltaic windows by chemical bath deposition, 28
Electrochemical deposition of SnS thin films, 98
Fast electrodeposition route for cadmium telluride solar cells, 118
Influence of sulphur on the electrical and optical properties of p-type $CuIn(S_xSe_{1-x})_2$ single crystals, 126
Novel approach to the chemical bath deposition of chalcogenide semiconductors, 150
Cadmium-free buffer layers deposited by atomic later epitaxy for copper indium diselenide solar cells, 183
Zinc-based buffer layer in the $Cu(InGa)Se_2$ thin film solar cells, 193
MicroRaman scattering from polycrystalline $CuInS_2$ films: structural analysis, 208
Electron-paramagnetic resonance (EPR) and light-induced EPR investigations of $CuGaSe_2$, 243
A study of the effects of varying cadmium chloride treatment on the luminescent properties of CdTe/CdS thin film solar cells, 248

Grain structure of CdTe in CSS-deposited CdTe/CdS solar cells, 253
The back contact influence on characteristics of CdTe/CdS solar cells, 293
Electronic loss mechanisms in chalcopyrite based heterojunction solar cells, 298
Structural and spectroscopic studies of CdS/CdTe heterojunction cells fabricated by electrodeposition, 314
Stability of $Cu(In,Ga)Se_2$ solar cells: a thermodynamic approach, 338
Chemical stability of Sb_2Te_3 back contacts to CdS/CdTe solar cells, 383
Electronically active defects in $CuGaSe_2$-based heterojunction solar cells, 415
Recrystallization in CdTe/CdS, 420
Some results from $CuGaSe_2$ solar cells prepared by rapid thermal processing, 454
Current transport in $CuInS_2$:Ga/Cds/Zno – solar cells, 458
A study of the back contacts on CdTe/CdS solar cells, 463
Effect of substrate temperature and depostion profile on evaporated $Cu(InGa)Se_2$ films and devices, 473
Modelling polycrystalline semiconductor solar cells, 527
Processes for chalcopyrite-based solar cells, 533

Solution Bridgman
Influence of sulphur on the electrical and optical properties of p-type $CuIn(S,Se_{1-x})_2$ single crystals, 126

Speciation
The importance of ternary complexes in defining basic conditions for the deposition of ZnS by aqueous chemical bath deposition, 17

Spectroscopy
A study of the effects of varying cadmium chloride treatment on the luminescent properties of CdTe/CdS thin film solar cells, 248

Spray pyrolysis
Spray pyrolysis deposition of cadmium–zinc oxide thin films, 53
Composition and structure of $CuInS_2$ films prepared by spray pyrolysis, 61

Sputtering
Deposition of smooth $Cu(In,Ga)Se_2$ films from binary multilayers, 74

Stability
Influence of damp heat on the electrical properties of $Cu(In,Ga)Se_2$ solar cells, 283
Stability of $Cu(In,Ga)Se_2$ solar cells: a thermodynamic approach, 338

Stannite
Structural characterization of $CuIn_2Se_{3.5}$, $CuIn_3Se_5$ and $CuIn_5Se_8$ compounds, 70

Stoichiometry
Deposition of smooth $Cu(In,Ga)Se_2$ films from binary multilayers, 74
Electrodeposition of epitaxial CdSe on (111) gallium arsenide, 84
Lateral inhomogeneities of $Cu(In,Ga)Se_2$ absorber films, 258
Calculation and experimental characterization of the defect physics in $CuInSe_2$, 446

Structure
Electrodeposition of epitaxial CdSe on (111) gallium arsenide, 84

Structural properties
Heteroepitaxy of $CuIn_3Se_5$: a review of the material and interface properties, 41
Composition and structure of $CuInS_2$ films prepared by spray pyrolysis, 61
Novel depth profiling in Cds-CdTe thin films, 234

Structure modification
Structure modifications in chalcopyrite semiconductors, 218

Substrate temperature
Effect of substrate temperature and depostion profile on evaporated $Cu(InGa)Se_2$ films and devices, 473

Sulfur
Investigation of thin films of the Cu–In and $CuInS_2$ system, 56

Sulfur diffusion
Structural and spectroscopic studies of CdS/CdTe heterojunction cells fabricated by electrodeposition, 314

Superclusters
The Electronic effects of point defects in $Cu(In,Ga_{1-x})Se_2$, 330

Superstrate
Characterization of $CuGa_3Se_5/ZnO$ for superstrate solar cells, 239

Superstrate cell
Large area electrodeposition of $Cu(In,Ga)Se_2$, 309

Surface
Influence of sodium on the growth of polycrystalline $Cu(In,Ga)Se_2$ thin films, 161

Surface modification
Electrochemical solutions to some thin-film PV manufacturing issues, 278

Surface photovoltage
Lateral inhomogeneities of $Cu(In,Ga)Se_2$ absorber films, 258

Surface treatments
Wet treatment based interface engineering for high efficiency $Cu(In,Ga)Se_2$ solar cells, 187

Texture
Texture manipulation of $CuInSe_2$ thin films, 167

Thermal oxidation
Photoelectric properties of heterostructures based on thermo-oxidated GaSe and InSe crystals, 123

Thermochemistry
Stability of $Cu(In,Ga)Se_2$ solar cells: a thermodynamic approach, 338

Thin films
Flash evaporation of chalcogenide thin films, 22
Photovoltaic windows by chemical bath deposition, 28
Modelling of the structure of CdS thin films, 34
Investigation of thin films of the Cu–In and $CuInS_2$ system, 56
Composition and structure of $CuInS_2$ films prepared by spray pyrolysis, 61
Deposition of smooth $Cu(In,Ga)Se_2$ films from binary multilayers, 74
Molten salt route for ZnSe high-temperature electrosynthesis, 107
A novel deposition technique for compound semiconductors on highly porous substrates: ILGAR, 113

Influence of the electrochemical deposition parameters on the microstructure of MoS_2 thin films, 223
The back contact influence on characteristics of CdTe/CdS solar cells, 293
Recrystallization in CdTe/CdS, 420
Chemical bath deposited Zn(Se,OH)$_x$ on Cu(In,Ga)(S,Se)$_2$ for high efficiency thin film solar cells: growth kinetics, electronic properties, device performance and loss analysis, 450
Some results from $CuGaSe_2$ solar cells prepared by rapid thermal processing, 454
A PL study of CIGS thin films implanted with He and D ions, 488
High efficiency CSS CdTe solar cells, 520
Modelling polycrystalline semiconductor solar cells, 527
Thin film solar cells
Investigation of the influence of silver on the crystal growth of $CuInS_2$ thin films, 88
Lateral inhomogeneities of Cu(In,Ga)Se_2 absorber films, 258
Nano-structural investigations on Cd-doping into Cu(In,Ga)Se_2 thin films by chemical bath deposition process, 346
EBIC and luminescence mapping of CdTe/CdS solar cells, 364
Low cost techniques for the preparation of Cu(In,Ga)(Se,S)$_2$ absorber layers, 514
Manufacturing of CSS CdTe solar cells, 547
Thin film technology
Processes for chalcopyrite-based solar cells, 533
Tin oxide
Microstructure of electrodeposited CdS/CdTe cells, 321
Transition metal dichalcogenide
Influence of the electrochemical deposition parameters on the microstructure of MoS_2 thin films, 223
Transmission electron microscopy
Heteroepitaxy of $CuIn_xSe_y$: a review of the material and interface properties, 41
Characterization of $CuGa_xSe_y$/ZnO for superstrate solar cells, 239
Nano-structural investigations on Cd-doping into Cu(In,Ga)Se_2 thin films by chemical bath deposition process, 346
Structure of extended defects in epitaxial $CuInS_2$/Si(111), 437
Structural and electronic properties of epitaxially grown $CuInS_2$ films, 504
Transparent conducting oxides
Spray pyrolysis deposition of cadmium–zinc oxide thin films, 53
Tunneling
Thermally assisted tunnelling in Cu(In,Ga)Se_2-based photovoltaic devices, 268
Electronic loss mechanisms in chalcopyrite based heterojunction solar cells, 298
Type-conversion
Annealing of monocrystalline $CuInSe_2$ samples, 482

Vacuum evaporation
Recrystallization in CdTe/CdS, 420

Window layer
Characterization of $CuGa_xSe_y$/ZnO for superstrate solar cells, 239

X-ray diffraction
Spray pyrolysis deposition of cadmium–zinc oxide thin films, 53
Composition and structure of $CuInS_2$ films prepared by spray pyrolysis, 61
In situ RBS analysis of $CuInSe_2$, 93
Novel depth profiling in Cds-CdTe thin films, 234
Annealing studies on CuIn(Ga)Se_2: the influence of gallium, 400
X-ray fluorescence
Photoluminescence and X-ray fluorescence measurements of successively thinned $CuGaSe_2$ films, 229
Control of V_{Se} defect levels in $CuInSe_2$ prepared by rapid thermal processing of metallic alloys, 432
X-ray photoelectron spectroscopy
SnO_2 substrate effects on the morphology and composition of chemical bath deposited ZnSe thin films, 177
XPS and raman investigations of nitrogen ion etching for depth profiling of $CuInSe_2$ and $CuGaSe_2$, 498
X-ray photoemission spectroscopy
Annealing studies on CuIn(Ga)Se_2: the influence of gallium, 400

Zinc oxide
Charging and discharging of defect states in CIGS/ZnO junctions, 140
Zinc oxysulfide
Cadmium-free buffer layers deposited by atomic later epitaxy for copper indium diselenide solar cells, 183
Zinc sulphide
The importance of ternary complexes in defining basic conditions for the deposition of ZnS by aqueous chemical bath deposition, 17
Zinc-blende
Structure modifications in chalcopyrite semiconductors, 218
Zn(Se,OH)$_x$
Chemical bath deposited Zn(Se,OH)$_x$ on Cu(In,Ga)(S,Se)$_2$ for high efficiency thin film solar cells: growth kinetics, electronic properties, device performance and loss analysis, 450
ZnO
Electrochemical deposition of zinc oxide films from non-aqueous solution: a new buffer/window process for thin film solar cells, 79
Zinc-based buffer layer in the Cu(InGa)Se_2 thin film solar cells, 193
ZnS
Electrostatic assisted aerosol jet deposition of CdS, CdSe and ZnS thin films, 102
ZnSe
Molten salt route for ZnSe high-temperature electrosynthesis, 107
ZnSe thin films grown by chemical vapour deposition for application as buffer layer in CIGSS solar cells, 172
SnO_2 substrate effects on the morphology and composition of chemical bath deposited ZnSe thin films, 177
ZnTe
Characterization of II–VI compounds on porous substrates, 213
Electrodeposition of ZnTe for photovoltaic cells, 388
